

The Over-Under Cable Wrap

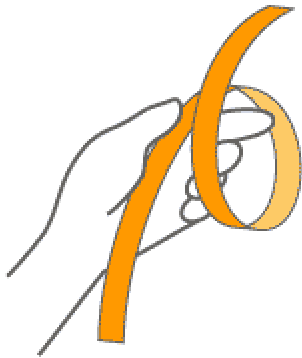

Step One:

Step Two:

Step Three:

The One-Foot Over Loop

Holding the male connector in your left hand, make a one-foot clockwise loop.

The Over-Under Cable Wrap

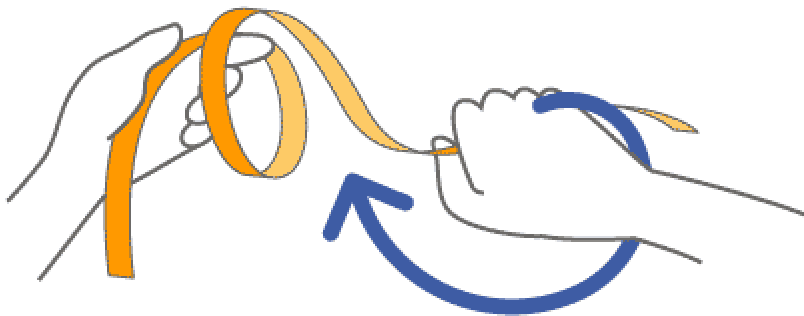

Step One:

Step Two:

Step Three:

The Under Loop

Gather up about two feet of cable in your left hand and make a clockwise loop, moving your right hand toward your left hand and grabbing the top of the loop with your left fingers. Adjust the loop size to make sure it is the same size as the first.

Step One:

Step Two:

Step Three:

Make More Loops

Continue making new loops (Alternating Over Loops with under loops) with your right hand while you gather the coil in your left hand until you reach the other end. Secure the coil with cable tie wrap or string and store neatly. (Sometimes a drumhead is a handy place to store cable coils.)
